

COVID-19 vaccine has arrived in Indiana

The [U.S. Food and Drug](#)

[Administration](#) has issued an Emergency Use Authorization (EUA) allowing shipments of COVID-19 vaccine to be sent to Indiana and other states.

Any Hoosier age 80 and older, first responders (fire, law enforcement, emergency medical services, reservists and volunteers) who have in-person contact with the public, and licensed and unlicensed healthcare workers who have in-person contact with patients or infectious material in any healthcare setting are now eligible to schedule a vaccination appointment. Eligible professionals should receive an invitation and registration link from their employer, professional association, or the State of Indiana (Indiana Department of Health, Professional Licensing Agency, Family & Social Services Administration, Department of Homeland Security, or another state agency).

Please be patient, as vaccine supply is limited. If you are a licensed healthcare provider, make sure your email is updated with the [Indiana Professional Licensing Agency](#) and continue to check your email and SPAM. If you are eligible and haven't received an invitation, please ask your employer.

If you have difficulty registering online or if you know someone eligible to get vaccinated who doesn't have access to a computer, please dial 211 from any phone to register.
